

Deegam® Reports

DEEGAM ® REPORTS include details of new issues and findings and show what changes have been made to *The Complete Deegam ® Machin Handbook* since the previous Report. They are issued every 10 weeks or so and are free to owners of the Handbook who register with the author. They can be downloaded from www.deegam.com using your Personal Reference Number (PRN) which was allocated on purchase.

Although their content has been incorporated into the master files on the current CD, the Reports from No. 76 to the date you purchased your CD have been included in the `deegam\reports` folder. The table below lists them and shows their main content. The full content of each Report file is shown in its Bookmarks when you open it.

Each DGR number in the table is a hidden link to the Report if you have saved it to a folder named `c:\deegam\reports`. Items in Reports that have a blue underline link to other files on the CD. An index to the content of Reports is on pages 3 and 4 of this file.
